

SARTHI OS

Intelligence. For Water.

*The world's first intelligent operating system,
designed exclusively for water softeners.*

Purity Hub created SARTHI to solve a fundamental gap in water softening — the lack of intelligence. Traditional systems react only after problems occur. SARTHI was built to predict, protect, and prevent. Designed for real-world Indian conditions, it transforms water softeners into smart, connected systems that ensure stability, efficiency, and complete peace of mind.

INTELLIGENT MONITORING

Always Aware. Always Ahead.

Real-time visibility into what truly matters.

SARTHI continuously monitors power stability, salt levels, regeneration status, pressure fluctuations, and tank levels. Every parameter is observed in real time — eliminating blind spots and preventing unnoticed performance drops.

You don't check the system. The system checks itself.

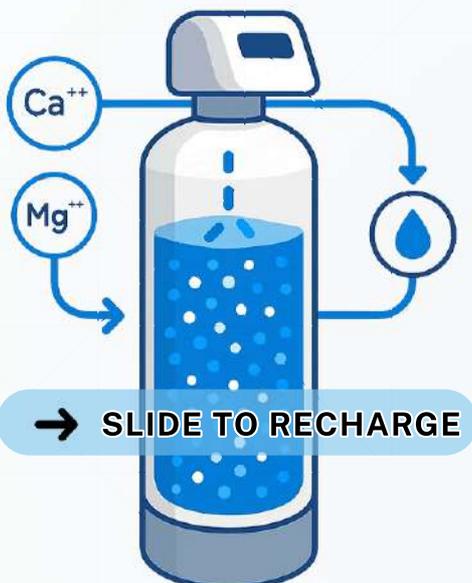

REMOTE REGENERATION

Control Without Presence.

Regenerate your system from anywhere.

Whether you're travelling or at work, SARTHI allows secure remote regeneration through your smartphone. No rooftop visits. No manual activation. Complete operational control — whenever you decide.

Convenience engineered into performance.

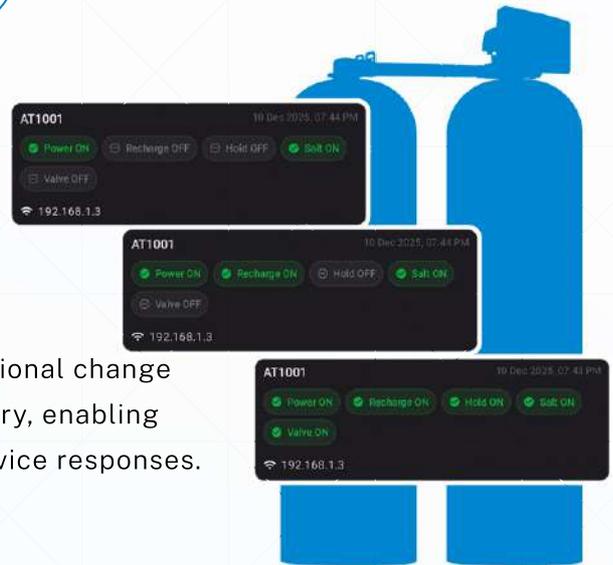

ACTIVITY LOGS

Every Action Recorded.

Transparency built into every cycle.

Each recharge, alert, power interruption, and operational change is logged. SARTHI maintains a detailed system history, enabling data-driven decisions and faster, more accurate service responses.

No assumptions. Only evidence.

MONTHLY AI REPORTS

Insight, Not Just Information.

Understand what's happening inside your system.

SARTHI generates intelligent monthly reports analyzing efficiency, regeneration behavior, salt usage patterns, and system stability. Instead of raw data, you receive structured clarity.

Performance measured. Confidence assured.

MULTI-USER ACCESS

Connected Across Generations.

Monitor your system — and your family's — from anywhere.

With Android and iOS compatibility, SARTHI enables multi-user access. Track installations at your parents' home or multiple properties effortlessly.

Care doesn't depend on proximity

TRUE IOT ARCHITECTURE

Connected. Intelligent. Always Online.

Your water system is no longer isolated.

SARTHI is built on a secure IoT foundation that connects your softener to a live digital ecosystem. Every 2 minutes, system data syncs securely to the cloud, enabling real-time visibility, remote diagnostics, intelligent alerts, and AI-driven analysis.

This is not just remote access. This is connected infrastructure.

DEDICATED SARTHICARE SUPPORT

You're Never Alone.

Technology supported by human oversight.

A dedicated SARTHICARE manager continuously monitors your system's health. If irregularities are detected, proactive guidance follows.

It's not just smart technology. It's intelligent support.

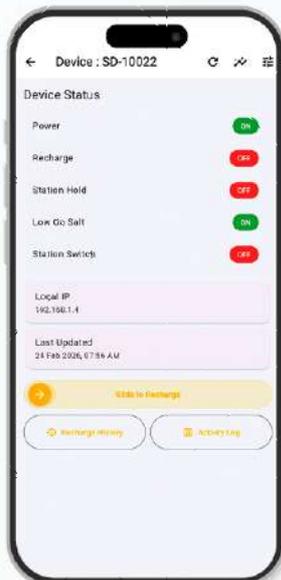

UNIFIED DASHBOARD

One Interface. Complete Control.

Manage multiple Purity Hub systems seamlessly.

Monitor performance parameters, review alerts, and control operations from a single, elegant dashboard. Whether one property or several, oversight remains simple.

Complex systems. Simplified control.

INSTANT NOTIFICATIONS

Alerts That Matter.

In-app and WhatsApp notifications in real time.

Critical alerts reach both you and Purity Hub simultaneously. Technicians arrive informed – reducing diagnosis time and minimizing disruption.

Faster response. Smarter service.

PREDICTIVE PROTECTION

Prevent Before Repair.

From reactive servicing to predictive intelligence.

SARTHI identifies patterns indicating potential failure – unstable recharge cycles, repeated salt neglect, abnormal pressure behavior – and alerts you before damage occurs.

Protection begins before problems.

BUILT FOR INDIA

Engineered for Real-World Conditions.

Designed specifically for Indian infrastructure challenges.

Voltage instability, pressure variation, irregular water supply – SARTHI adapts intelligently to real conditions, ensuring reliable performance where traditional systems struggle.

Built for performance-driven homeowners.

Built for India.

MADE IN INDIA, MADE FOR THE WORLD
